

Dear Hiring Manager,

I am writing to express my interest in the Software Engineering, at identifeye HEALTH Inc. As an Electrical Engineer with experience teaching robotics and makerspace to children and a current Master's degree student in Computer Science & Applications, I am excited about the opportunity to bring my skills and passion to your team.

My name is Daniel Vargas Díaz, and I graduated from the University of Costa Rica with a degree in Electrical Engineering. Currently, I am pursuing my Master's degree in Computer Science & Applications at Virginia Tech. My passion for research, technology, entrepreneurship, education, and mental health has led me to explore various disciplines like Human-Computer Interaction, Biomedical Engineering, Pattern Recognition, and Artificial Intelligence.

During my experience as a robotics and makerspace teacher for children from 6 to 15 years old, I was able to engage young students in STEM fields while fostering their creativity and critical thinking skills. As an international and first-generation student, I can bring a unique perspective to the problems faced by the organization. Costa Rica is a country with limited resources, which means that students and researchers had to use the available resources in a smart way to generate new solutions. As a first gen, I also know how to use money wisely, which is a valuable resource in any organization. An example of this skill is when I was a robotics teacher, and we used recycled materials and just a few electronic components to build robots instead of using expensive parts.

My volunteering experiences with different NGOs and groups have also shown me the importance of education and mental health in the early stages of life. These experiences have inspired me to design tools to improve mental health and education in the region.

My diverse background and passion for research, technology, education, and mental health make me an excellent candidate for the Software Engineering. I am excited about the opportunity to work with a dynamic and innovative team, and I am confident that my skills and experiences will enable me to make valuable contributions to your organization.

Thank you for considering my application. I look forward to the opportunity to further discuss my qualifications and learn more about the role.

Sincerely,

Daniel Vargas Díaz
